October is Breast Cancer Awareness Month.

One in eight women in the US will develop invasive breast cancer. Diagnosing it early gives you the best chance to fight it and win. Protect your health by following this simple checklist:

- Know your risk:** If anyone in your family has a history of breast cancer your risk is greater. Speak with your doctor.
- Get Screened:** Have a clinical breast exam every 3 years starting at the age of 20. At the age of 40, you should do the exam every year along with a mammogram.

Breast Cancer is a qualifying condition for the use of Medical Marijuana in the State of Florida.

If you have questions about how Medical Marijuana can help with breast cancer, we have answers, and an individualized plan tailored for you based on holistic healing and evidence-based medicine.

Visit our website at drdamas.com for more information about how breast cancer patients have used cannabis to improve their quality of life.
